# About us

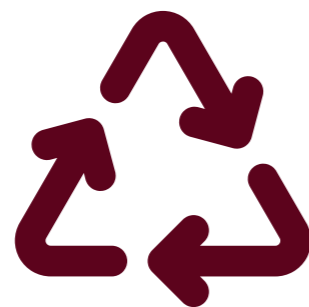

We are TABB Interior Systems B.V., based in Tilburg, and for the past 15 years we have been designing and manufacturing interior systems that are at the forefront in work and living environments with high user demands, such as in the train industry.

We design and build interior systems that focus on sustainability, function integration and weight reduction. The close collaboration with our clients is central. This enables us to successfully develop interior systems that meet the highest demands. We strive to bring groundbreaking ideas to life.

As TABB, we are here for organisations looking for new ways to improve interior design with us. Together, we want to invest in sustainable, innovative and also unique workspaces that enhance user well-being.

In addition, we are continuously exploring how we can apply new insights to our distinctive products based on our vision. That is why we are passionate about our work. We are innovative and ambitious to further explore the possibilities we envision.

# Circularity

The materials we use to make Cabb-ins such as the aluminium, glass, upholstery and stainless steel consist of a significant proportion of recycled materials. Similarly, we are the only manufacturer to have an active return policy as our Cabb-ins are as much as 98% reusable. We aim to have our operation completely carbon-neutral by 2030.

We can achieve this because, first of all, we don't build layers upon layers, but use our self-developed and patented SMRTCOMB® technology. This makes the Cabb-in easy to (dis)assemble. Thanks to this modularity, different materials can be easily separated from each other at the end of its service life. The result is not only a modular, cost-efficient, but also a light and extremely robust solution.

Cabb-ins are produced entirely in the Netherlands. The products and materials we use are almost all sourced in Europe, a key factor in minimising our carbon footprint.

Finally, the Cabb-in is packed and transported directly from the Tilburg factory to our customer with sustainable and reusable packaging. This packaging is returned to our factory after delivery and installation for a new delivery.

# Customisation

We personalise our Cabb-ins in close collaboration with our customers. We work together to bring groundbreaking ideas to life. Style and function are innovatively combined to create an eye-catcher that suits your environment. As a result, it becomes a Cabb-in modelled to your requirements that provides a working experience of the highest level.

From design to realisation and maintenance: we ensure a carefree process.

Visit one of our showrooms  
Would you like to be inspired by the unique designs of our Cabb-ins? We invite you to experience these acoustic workspaces for yourself. You are always welcome to visit a reseller of our Cabb-ins.

More information can be found on our website.

# Up

## Up your focus

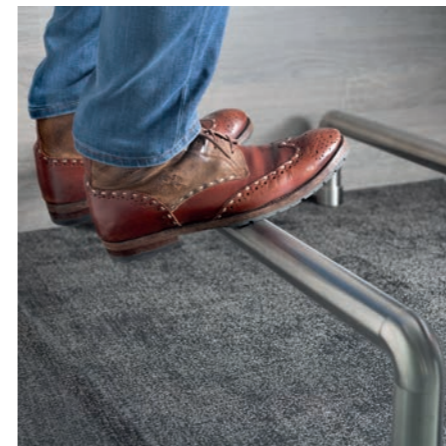

The Up single cubicle is ideal as a phone box or temporary workstation and perfect for efficient work or video calling. This workspace is made for short-term use with more privacy. And as soon as you take a seat in the Up, others continue working undisturbed. Moreover, this Cabb-in comes with all the conveniences appropriate for short-term use such as the built-in desk, folding bench and footrest.

Your battery may be recharged, but is your phone's? We have built in a USB port as well as a power socket.

A laptop on the desk is worth two in the hand. You can make convenient use of the built-in standing-height desk.

Time will tell whether you belong to the long-term or short-term users. The ergonomic footrest further helps you sit comfortably.

# Single

Single, yet connected

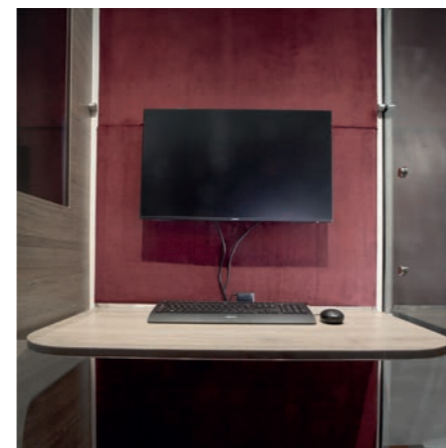

In the modern open office environment, there is often little space to work in complete quiet, even though there is sometimes a need for it. Step inside the Single work cubicle and experience both the peace and productivity of your own mini-office. The glass door provides a modern look first and keeps you connected to your surroundings second.

Speech is silver, muffling is golden. Together with the wall coverings, the ceiling provides you with a pleasant acoustics.

Space is the key to growth. Whether you are sitting, standing or a colleague comes to take a look, the Single offers more space than you think.

There's no place like your own mini-office. All space is utilised with the help of the built-in desk.

# Double

Double way to work

The Double acoustic workspace offers a unique solution for the open-plan working environment. Not only can you work in it together or individually, but you can also meet in it or even give a presentation. With its sleek design and glass doors, you also stay connected to your surroundings. Experience how pleasantly and easily you can work efficiently in this space.

There is always a cheerful atmosphere in the air. The dimmable lighting lets you set the right mood.

You can be in the lap of luxury with our sofas, crafted from soft and recycled material.

A Double without cosiness is like working together on your own. Whether you are alone, together, three or four, it all fits.

# Wait

Wait and connect

There are moments when comfort is needed, but not separation with doors. The curved roof and SMRTCOMB® walls significantly reduce ambient noise and provide extra privacy. By lining the interior with cork and soft upholstery, the acoustics become very pleasant. Ideal for in an open work environment, healthcare, schools or event venues.

# Free

Free your mind

Mid 2025

We are happy to add this outdoor version, the Free, as a workspace in the future office world. Working outdoors leads to better connection, as you engage more with the environment and with each other. Creativity, concentration and inspiration arise faster here than in a standard office environment. Equipped with all the comforts for an optimal work environment, stress regulation, creativity, enjoyment, and fresh air.

Beneath the first spring sun, you could be the first to head out and paint the town red. The roof provides wonderful shade.

If it gets extremely hot in the summer and the chickens might start laying boiled eggs, you'll have a duo door. You can open the windows in the doors for extra ventilation.

During all those beautiful autumn weeks, relish the full range of colors, safe and sound. With terrain feet, you'll always be dry in the Free.

And when that icy winter falls, you stay indoors, wonderfully warm. We have built in seat heating for the cold days.

# The Cabb-in Cycle

*How does a Cabb-in enter the workplace? What is the role of our customers? And do we really take the product back at the end of its lifespan? We are happy to guide you step by step through our circular process.*

## Contact - Call us!

Collaboration is in our DNA. We actively work with our clients to understand their needs and desires. This allows us to deliver products or solutions that perfectly align with what they are looking for.

## Customisation - We do it together!

The foundation of the Cabb-in is solid, but above all, we can customize the design and appearance to suit your preferences. We are flexible and adapt, designing and collaborating with the client to ensure the Cabb-in is showcased in the best possible way.

## Production - Reliable!

Our engineers and experts have been working with the lightweight and extremely robust SMRTCOMB for 15 years. In our factory in Tilburg, we are able to produce designs with precision down to the millimeter. As a result, our products are safe, efficient, and of high quality.

## Delivery - We take care!

With the custom-designed and reusable transport crate and packaging material, our technicians ensure a sustainable, safe, and ergonomically responsible delivery. Moreover, Cabb-ins are modular, making them easy and quick to assemble on site.

## Freedom - Use & enjoy!

Being able to work freely promotes user well-being and productivity. The integrated smart technologies ensure optimal comfort and a work environment that makes working accessible, easy, and pleasant for everyone, anywhere.

## Recycling - Feels good!

### Active return policy

Virtually all parts are reusable and we can give them a second life. If the Cabb-in is obsolete, give us a call and we will take it back. This is how we contribute to the circular economy.

# Lease & buy

We offer flexible options for both purchasing and leasing our silence workstations. Thus you can choose to buy or lease a Cabb-in, depending on what best suits your company's needs as well as budget. In short, this way we always guarantee a solution that fits your situation perfectly.

*Facility & Building Management Trade Fair 2024*

# Experience

Would you like to be inspired by the unique designs and possibilities of our Cabb-ins? Or would you like to experience these workspaces for yourself? Contact us to find out which showroom the different Cabb-ins are in. Discover on-site the creativity and potential of our workspaces alongside their exceptionally innovative design.

In addition, we are regularly present at various trade fairs, where we are eager to explore the type of collaboration you are looking for. Besides the endless possibilities of our Cabb-ins, we are curious about how you would like to improve your interior design.

And we take it a step further. If you are truly fascinated by our vision on interior systems, join one of our interactive presentations. We will show you around our factory, take you through our vision and are eager to hear yours.
